## **DETAILED ACTION**

### *Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, 30-36, and 59-65, drawn to a method for compressing image chroma information, classified in class 375, subclass 240.29.
  - II. Claims 8-15, 37-44, and 66-73, drawn to a method for reducing chroma noise during compression, classified in class 375, subclass 240.27.
  - III. Claims 16-22, 45-51, and 74-80, drawn to a method for improving the coding efficiency for a color space representation of a video image, classified in class 375, subclass 240.01.
  - IV. Claims 23-29, 52-58, and 81-87, drawn to a method for improving the video characteristics of a color video image, classified in class 375, subclass 240.26.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I-IV have separate utility such as those different limitations indicated in the respective grouping of claimed inventions outlined above. See MPEP § 806.05(d).

Art Unit: 2613

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III, or IV, and vice versa, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Mr. K. Jenckes on 4/28/03 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Y. Lee whose telephone number is (703) 308-7584.
